Product & Solutions Videos

e-F@ctory Connecting Everything

Installing "IoT" or "Industry 4.0" in your factory is not your goal. Making a cost-efficient, flexible and high quality production line is. The key to digitalisation is the integration of IT and FA / OT systems, e-F@ctory utilises a refined form of 'Edge Computing' to easily bridge both systems into one.

CC-Link IE

CC-Link IE is the optimal network choice for complete manufacturing control up to the business information system level. It is vertically integrated and Ethernet-based network from IT layer to field layer, providing ultra-high speed & large capacity network with real-time performance.

One-Stop Solution for Manufacturing

Diverse manufacturing needs can be met Mitsubishi Electric Factory Automation products, your one stop solution provider.

Robot and Packaging Machine Synchronization System

The packaging industry is currently being faced with a lack of precision and speed of devices, high costs, wastage of materials and lack of hygiene. All of these limitations can be resolved through the development of an optimal packaging line.

Upcoming Activities

We welcome you to visit us at the upcoming exhibition to find out more on our products.

16th - 18th Oct 2018
Singapore EXPO
Singapore

27th - 29th Nov 2018
Marina Bay Sands
Singapore

Past Activities

Check out the activities we have participated and how we have showcased our products and solutions for your needs.

autoMEX

23rd - 26th May 2017
Putra World Trade Centre
Kuala Lumpur, Malaysia

Useful Tools

FA e-Learning

We offer FA e-Learning programs in 17 languages, including English, Chinese and Thai. Use our program to help your local staff in overseas production sites to gain fundamental technical skills
